

How can you tell who's right for your graduate program?

Assess ability and predict performance with the GRE® General Test.

A proven record of success in partnership with the graduate community

For nearly six decades, the GRE® General Test has played an important role in the graduate admissions process

- Administered continually since 1949
- Taken by more than 550,000 students in the 2006 testing year
- Delivers score reports to more than 3,100 graduate institutions annually
- Developed and administered by ETS, the world's largest private nonprofit educational testing and measurement organization and a leader in education research
- Ongoing development of the GRE testing program is facilitated by the GRE Board, whose members include graduate deans appointed by the Association of Graduate Schools and the Council of Graduate Schools

Provides the information you need to carefully evaluate your applicants

- Measures skills that faculty and graduate deans have identified as essential to graduate school success, including verbal reasoning, quantitative reasoning, critical thinking and analytical writing
- Provides the only common measures of these skills for comparing the qualifications of applicants from different educational backgrounds and countries of origin
- Furnishes independent information to supplement the evaluation of grades and recommendations
- Offers a valid predictor of graduate school performance, as confirmed by a recent independent study using 82,000 graduate students and over 1,700 studies containing validity data for GRE tests

Convenient and cost-effective

- Extensive worldwide test center network allows easy access to testing
- Price per test is substantially less than many other graduate admissions tests
- The GRE Program provides assistance with the test fee to individuals with a demonstrated financial need
- Free test preparation software is available to all test registrants to assist them in performing their best on the test
- Test takers can send scores to up to four graduate institutions at no extra cost
